

PROJECT CASE STUDY

NATURAL GRASS BASEBALL

Project	Application	Product	Location	Year
Toronto Blue Jays Spring Training Fields	New Drainage System installed on several Natural Grass	Hydraway 2000	Florida Auto Exchange Stadium Dunedin, FL	2011-2013

Problem

After rain event, fields were unplayable for days.

Solution

Toronto Blue Jays contacted us to try out Hydraway on one field in 2011. They gave us their worst draining field to see if the system would work. Immediately after installation, they realized the system worked wonders. In the course of 3 years, they have installed Hydraway 2000 on several of their practice fields and most recently, on the game field at the Florida Auto Exchange Stadium.

Result

As a result of the success the Blue Jays experienced, several MLB teams would play at the Blue Jays fields instead of their own fields as they were unplayable.
