

PROJECT CASE STUDY

SYNTHETIC TURF FIELDS

Project

Joplin High School, Baseball & Football

Application

Synthetic Turf Field Drainage

Product

Hydraway 2000

Location

Joplin, MO

Year

2014

Problem

The High School and neighboring athletic fields were destroyed in a devastating tornado in May 2011.

Solution

A total rebuild of the High School was required, in addition to 4 new synthetic athletic fields. It was decided that Hydraway 2000 be utilized to drain the fields.

Result

The entire project of the school and the fields will be completed in Fall of 2014.
